IJ While passing up street we met with sev eral of our worthy Military Officers, wearing their splendid uniforms, and after inquiring for the manufacturer of these most beautifully made suits, they told us they had them made at the well known "Capital City Arcade," superintended by Mr. MARCUS CHILDS. These military gentlemen assured us that Mr. CHILDS has the best and largest assortment of cloth adapted for military purposes, of any house in the city, and excels all his competitors in regard to low prices and superiority of material. By instituting further inquiries, we ascertained that Mr. CHILDS has made a great many of these uniforms, comprising all offices: Colonels, Majors, Captains, and First and Second Lieuten-

The perfect fit of these suits satisfied every one of these gentlemen, as the cutter, Mr. MUNTZIE, at Mr. CHILDS' establishment, has had several years' experience in France in getting up Military Uniforms.

Proc. Wood: Thee wilt please accept a line to inform thee that the hair on my head all fell off over twenty years ago, caused by a compileated chronic disease, at tended with an eruption on the head. A continual course of suffering through life having reduced me to a state of dependence, I have not been able to obtain stuff for caps, neither have I been able to do them up, in consequence of which my head has suffered extremely from cold. This induced me to pay Briggs & Hodges almost the last cent I had on earth for a two dollar bottle of thy Hair Restorative, about the first of August last. I have faithfully followed the directions, and the bald spot is now covered with hair theke and black, though short, it is also coming in all over my head. Feeling confident that another large bottle would restore it entirely and permanently. The manufacture consists in the application of a peculiar composition or enamel to common red bricks, and a variety of other building material, ornamental architectural finishings, ceilings, tiles for floors and for roofing.

This enamel may be tinted of any color, from the purest white to the deepest black, with all the colors and shades between. It imparts to the articles to which it is applied a hardness and durability almost incredible, and a beauty surpassing that of the rarest and most costly of the variegated marnies, and, unlike them, is impervious to moisture, and will never fade stain, or deteriorate, costing but a fractional part of the price of ordinary marble,
